Abstract (en)

[origin: WO2009103912A1] The invention relates to an anti-theft housing that comprises two shells (1, 2) hinged at one end by a hinge and having at the other end a locking means that includes a sound alarm (11), characterised in that the same comprises a first pull tab (14) capable of translation and activated by a pulling force on the front wall of the locking mechanism, and acting on the locking means of the two shells (1,2) when the latter are assembled, and a second pull tab (13) capable of translation independently from the first pull tab (14) and activated by a separate action for activating the sound alarm.
