Abstract (en)
[origin: WO2009109049A1] There is provided a light fixture for mounting to a ceiling, wall or the like, which comprises a pot having a peripheral edge abutting the area adjacent a hole made in the ceiling or wall. A hook and a bolt cooperate to secure the pot to the ceiling or wall. Rotating the bolt causes the hook to move into an abutting engagement with the rear surface of the ceiling, the latter thus being contacted, on the outside, by the peripheral edge of the pot and, on the inside, by that portion of the hook engaging the rear surface of the ceiling.
