Abstract (en)

[origin: WO2009112733A1] The invention relates to a voltage maintaining apparatus (12) that is part of the starting and power-generation system of an automobile, and that comprises a first power source (10) associated with a battery sensor (130) provided with a current sensor and an electronic portion integrated in the device apparatus (12), and a second power source (11). The invention can be used in the automotive industry.
