Abstract (en)
[origin: EP2250933A1] The drawer has a drawer frame (2) movably arranged in an interior of a cupboard body (1). The frame has a vertically aligned support column (4) that is connected with a lower drawer frame profile. The profile is movably guided into a cupboard body guide (6) in the course of movement of the drawer and is supported at a shelf board (9). The shelf board is height-adjusted at the support column and is lockable at the support column using a connector in different height positions. The support column has a slot-shaped duct, where the shelf board is engaged with the connector in the duct.
