Abstract (en)

[origin: EP2251152A1] The tool (1) has a housing (5) with two separate housing parts (2, 4) connected with each other. One housing part is formed as a handle part for holding and guiding the hand power tool. Damping elements (6, 7) are arranged in a transmission path between the housing parts. The handle part is firmly connected with a motor housing part (2b). The handle part and the motor housing part are connected with each other. A drive motor is arranged in another motor housing part (2a) that is not connected with the handle part.
