Abstract (en)

[origin: EP2251273A1] The invention relates to a thermal container which can be used to store drinks and food, characterized in that the walls thereof comprise three layers, namely: an intermediate layer (3) made from propylene, polyurethane foam or expanded polystyrene; an outer layer (2), and an inner layer (4), said outer and inner layers also comprising three panels in the form of an outer cardboard panel, an intermediate aluminum panel and an inner polyethylene panel. The container is intended primarily to retain the properties of wines under any circumstances and, more specifically, during transport from wine shops to the end user.
