Abstract (en)

[origin: EP2251274A1] The envelope (1) has a front panel (5) covering two lateral flaps in a folded state of the envelope, and presenting an upper band covered by a closure shutter (13) of the envelope. An interior of the shutter and/or exterior of the upper band is covered of an adhesive band (15) to closely maintain the panel. A less resistance line (17) extends across the panel from an area near a lower edge (3b) in a direction of the shutter to allow creation of a closure shutter (21) to open the envelope by ripping the front panel along a precut line, while the shutter (13) is closed and adhered to the panel.
