Abstract (en)
[origin: EP2251549A2] The assembly (1) has a pressuring medium pump (3) driven by a motor unit and comprising a load (4) with a pressurizing medium (5), where the motor unit is in form of an internal combustion engine. A pressuring medium accumulator (6) is recharged from the pressuring medium pump. A priority valve (7) controls electric charging of the pressuring medium accumulator and the pressuring medium supply unit of the load dependence of a momentary output of the motor unit. Connecting or disconnecting process of a pressuring medium supply is controlled by the load and/or another load (8) of a valve (9).
