Abstract (en)
[origin: EP2251591A1] The element has two cross-plate modules (4, 6) formed in one-piece and provided with cross-plates (2). The cross-plate modules are mechanically connected with each other in form-fit manner such that two end portions of longitudinal regions (21-24) are connected to form two connecting points (31, 32). A side part is connected with the cross-plate modules by a locking connection and forms a side reflector. The side part comprises a hole in which a pin of one of the cross-plate modules is engaged. The modules are made of plastic.
