Abstract (en)
[origin: WO2009109396A1] In a hinged lid box-type cigarette package, box side walls (24) and cover side walls (25) are made of wall sections (27, 28, 29) disposed adjacent to one another to mutually form a polygonal layout. The wall sections (27..29) are preferably designed with the same width and aligned at the same angles relative to one another and to the front and back side of the package.
