Abstract (en)
[origin: WO2009106535A1] A reclosable carton (11) is provided which may contain objects nearly the size of the carton that can be readily dispensed and where the carton can be conveniently re- closed by a user. A specific pattern of tear lines on the top (17) and front (19) panels allows easy opening and re-closing and allows for a reduction in packaging material usage to save production costs. The reclosable carton design reduces the risk of tearing other areas of the carton and maintains its integrity when it is opened by a user.
