Abstract (en)  
[origin: WO2009112320A1] A connection block, particularly a terminal block (1) that can be placed on a mounting rail, comprising a housing (5) having connections (3a, 3b, 4a, 4b) for connecting electrical conductors and at least one internal contact point (6, 7), and having a module (9), which expands the functions of the connection block and has at least one contact element (3d, 4d), by means of which in the installed state of the module an electrical connection to the internal contact point (6, 7) can be established, the connection block comprising an installation space (9) for accommodating the module (9), characterized in that the module (9) has at least one contact means (11), by means of which an electrical connection can be established to a contact point (12) external with respect to the connection block.
