Abstract (en)
[origin: US8466802B2] A manual connecting device includes a connecting tool to be guided manually for connecting a connection to a predetermined connecting point, in particular to a predetermined connecting point in an electrical switchgear cabinet or in an electrical control cabinet. The connecting device also includes a camera and an image processing device connected to the camera. The device is suitable for detecting a respective connecting point before, during or after connecting and for generating an alarm signal if the detected connecting point deviates from the predetermined connecting point.
