Abstract (en)

[origin: EP2253201A1] The drinker has a bowl (2) provided with a fixing unit (3) on a support i.e. wall, and a water supply unit (4). The water supply unit comprises a body (5) defining an internal supply duct (6) on a level of a back end of a connection device connecting to a water supply pipe and on a level of a front end of an operating device (11). The water supply unit comprises a filtration unit (12) arranged in an upstream of the operating device. The filtration unit is positioned on the internal supply duct of the body.
