Abstract (en)

The present invention relates to a lock (1) for furniture, in particular showcases and the like, comprising a first portion (2) intended to be associated with a first part of said furniture and a second portion (3) intended to be associated with a second part of said furniture, characterised in that said first portion (2) comprises a block (5) provided with a pin (9) and said second portion (3) comprises a body (24) having a tapered chamber (30) provided with an aperture (27) for the insertion of said pin (9), and a member (36) in a magnetic and/or magnetisable material positioned in said chamber (30) and provided with a plurality of locking members (41), said locking members (41) being able, in the use of the lock in the position of locking, to restrain firmly one in relation to the other said pin (9) inserted in said chamber (30) in cooperation with an internal shoulder (43) of said body (24), said member (36) in magnetic and/or magnetisable material being movable in response to the application of an external magnetic field of attraction against elastic means (42) towards a position wherein said locking members (41) are able to release said pin (9). The present invention likewise relates to a device (50) for the resting and the support of glass panels in a substantially perpendicular position one in relation to the other comprising a lock of the abovementioned type.
