Abstract (en)
[origin: EP2253787A2] The lock (1) has a driving mechanism (3) comprising a follower (9) to control a half-turn bolt extended in a front edge (8) of a casing (2) in a projecting locking position. Actuation units (17) activate operation rods (18, 19) respectively extended above and below the casing. A connection rod (20) connects the operation rods through a reversal device when necessary, extends along the edge of the casing in a parallel manner and comprises a slot (21) for passage of the bolt. The casing comprises maintenance and guidance units (29) to maintain and guide a head (13) of the bolt.
