Abstract (en)

[origin: EP2254007A1] The device has a time indicator hand (4) and a power reserve indicator unit cooperating with a fixed time scale (3). The time indicator hand is moved in a predetermined direction for indicating the time. The power reserve indicator unit is displaced in the predetermined direction during winding of the motor unit, and remains fixed during unwinding of a motor unit of the timepiece. The power reserve indicator unit is driven by the force coming from a shaft of the motor unit.
