Abstract (en)

[origin: EP2254391A2] The device (1) has a detection unit (10) i.e. sensor, to detect light emitted by a light source (2) i.e. LED, and a control device (5) to control the light source based on information transmitted by the control device. The detection unit or a part of the detection unit is temporarily arranged in a light path (7) for detecting the light emitted by the light source, where the detection unit or the part of the detection unit is pivotable along the light path. A light guiding element i.e. mirror, is arranged in the light path.
