Abstract (en)

[origin: WO2009114886A1] The invention relates to an immobilization device (5) for locking a furniture part (2) that is movably supported in or on a piece of furniture (1), particularly a drawer, in a closed end position (E), comprising at least one locking unit (6), which has a receiving element (7) for an engagement element (8) and a blocking mechanism (31) for the releasable fixation of the receiving element (7) in a position that locks the engagement element (8) when the movable furniture part (2) is in the closed end position (E), wherein the receiving element (7) or the engagement element (8) is disposed on the furniture (1) and the other element is disposed on the moved furniture part (2), wherein the locking unit (6) has an overload safety mechanism (32), which comprises at least two parts connected movably to each other and allows damage-free opening of the movable furniture part (2) even if the receiving element (7) is fixed in a position (31) that locks the engagement element (8) by means of the blocking mechanism (31).
