Abstract (en)  
[origin: WO2009118316A1] The invention relates to a telescoping pull-out guide (10) for an insertable and retractable pull-out from a body of furniture, which comprises a fixed guide rail (12) that is directly or indirectly fixed to the furniture body by means of fastening elements (13, 14, 28, 29, 30, 31). The aim of the invention is to dispense with the use of connecting elements between the fastening elements (13, 14, 28, 29, 30, 31) and the guide rail (12). According to the invention, the connection between the guide rail (12) and each fastening element (13, 14, 28, 29, 30, 31) is formed by at least one angle bar (16, 17), which engages into the through-hole (18, 19) and extends over the adjoining edge region, and by a safety plate (26) positioned in an opening, characterized in that each angle bar (16, 17) is formed by an indentation in the guide rail (12) and the free limb of each angle bar (16, 17) extends over the edge region of the fastening element (13, 14, 28, 29, 30, 31), which adjoins the through-hole (18, 19). The telescoping pull-out guide is particularly suitable for use in a body of home furniture or refrigerators.
