Abstract (en)  
[origin: WO2009116096A1] A metal board (1) for scaffolding comprising a metal base sheet (2), at least one support member (3A, 3B, 3C) and means for connecting (4) said at least one support member (3A, 3B, 3C) to said base sheet (2), characterised in that said connecting means (4) comprise a plurality of tabs (5) extending transversally from said base sheet (2) or respectively from said at least one support (3A, 3B, 3C) member, said tabs (5) projecting through a plurality of apertures (6) in said at least one support member (3A, 3B, 3C) or respectively in said base sheet (2) and further extending along said at least one support member (3A, 3B, 3C) or respectively along said base sheet (2) so as to be able to overlap said at least one support member (3A, 3B, 3C) or respectively said base sheet (2) in a junction zone (11) there between. The invention further comprises a pocess for manufacturing such a metal board.
