Abstract (en)
[origin: WO2009115592A1] The invention relates to a timepiece that comprises first and second display means of two pieces of information relating to the same time unit, and arranged so as to provide an easy reading of said pieces of information. The timepiece (1) is characterised in that the pivot members, on which the first (4) and second (5) display means are respectively mounted, respectively include a ring (6) and a shaft (7), the rotation axis of the shaft being contained within said ring (6) and offset relative to the rotation axis of said ring (6).
