Abstract (en)

[origin: WO2009112317A1] The invention relates to an electrical machine (12), especially for power-adjusting a mobile part in a motor vehicle, and to a method for operating said machine. The electrical machine according to the invention comprises a stator (34) and a rotor (18) having a radius (62), said radius (62) varying over the circumference of the rotor (18).
