Abstract (en)

[origin: EP2255686A2] The part (1) has a carrier layer (2) comprising an upper side (3) and a lower side (4), where the upper side comprises hairs (5) that are fastened to the lower side with plastic i.e. polyurethane. An adhesive layer (11) is arranged at the lower side in a layer sequence (9) and provided for attaching the replacement part to a bald part of a body. The adhesive layer has an effective surface that completely covers more than 70 percentages of the lower side, and is protected by a protective layer (12), where the protective layer is made from a plastic film i.e. silicone film. An independent claim is also included for a method for manufacturing a hair replacement part for attaching to a bald part of a body part.
