Abstract (en)

[origin: EP2255690A1] The shield has a slider (6) surrounding a pole and comprising paragon rods (5), which are connected with bottom rods (4), and a protective cover connected with the bottom rods. The bottom rods and/or the paragon rods are lined at a crown (3) and/or the slider by a bearing pin-bearing loop connection. Locking elements permit attachment of bearing loops on bearing pins (19) and detachment of the bearing loops only in a predetermined angle region of a position of the bottom and paragon rods to the crown and/or the slider.
