Abstract (en)

[origin: WO2008029222A2] The invention relates to a washing machine, in particular a dishwasher, of the type comprising a wash tub (10), a liquid supply duct (11) connected to a hydraulic outlet (70) located on a wall of said tub (10), and at least one upper rack (20) associated with an upper hydraulic circuit which comprises: - a sprayer (30) made of plastic material; a tubular element (40) comprising a first end (41) and a second end (42); connection means (50) providing the hydraulic and mechanic connections between said first end (41) of the tubular element (40) and said sprayer (30); and a linking device (60) adapted to engage into said hydraulic outlet (70). The invention is mainly characterized in that said connection means (50) comprise a bush (50) made of a material which is different from that used for manufacturing said sprayer (30).
