Abstract (en)

The invention concerns a dispenser for adhesive labels on a roll of stock comprising a first and a second shell half (2,3) coupled together in such a way as to form a container that is hollow on the inside and that contains said roll of stock, an opening (10) being provided for the exit of the free end of the roll from the container, and in which at least one of said shell halves presents on the lateral surface that will be on the outside of the container fastening means (4,5) shaped to cooperate with corresponding and identical fastening means located on another shell half of a different dispenser, in order to create a modular structure.
