Abstract (en)

[origin: EP2256262A1] The module has first and second sets of vertical squared lumbers (21, 21') provided with longitudinal extension directions, and a third vertical squared lumber (23) provided with a third longitudinal extension direction. Two sets of anchor bolts (24) are orientated along the third extension direction and are transverse to the first and second extension directions. One set of the bolts is arranged between the first and third sets of the lumbers, and another set of bolts is arranged between the second and third sets of the lumbers. The bolts are provided in different directions at an angle. An independent claim is also included for a method for producing a wood structure module.
