Abstract (en)

[origin: EP2256276A2] The bearing (3) has a frame sided fitting part (4), and a fitting part (5) that is rotated relative to the frame sided fitting part. An adjusting screw (11) is provided in a rotational axis of the fitting parts and screwed into one of the fitting parts. The adjusting screw adjusts the fitting parts in an axial direction. Holding devices (12) are connected with a lateral surface of the adjusting screw, and fixedly hold the screw in a force-fit manner.
