Abstract (en)

[origin: EP2256279A2] The part (19) has a closure wall (20), and a decorative bracket (21) that laterally projects in front of the closure wall. The bracket forms a lower side (33) that faces the closure wall. The bracket has two notches (34, 35) on the lower side, where one of the notches runs in a direction of a longitudinal extension. The other notch runs transverse to the former notch. The former notch is arranged at a distance (40) to a side surface (41) that is turned away from the bracket, where the distance corresponds to a wall thickness (42) of the closure wall.
