Abstract (en)

[origin: EP2256404A1] The arrangement (10) has a light element i.e. LED (1), and a cooling system (100) thermally coupled with the light element. The cooling system has an arrangement (42) for space heating and/or for water heating, to which waste heat of the light element is supplied. The cooling system has a heat exchanger (20) or a pressure exchanger and is arranged such that the heat exchanger or pressure exchanger couples a cooling circuit (30) and a hot water circulation part (40). The arrangement for space heating and/or for water heating is in the form of a radiator.
