Abstract (en)  
[origin: EP2256561A1] The invention relates to a method for operating a domestic appliance (1), wherein the domestic appliance (1) has at least one switching and/or adjusting element (2) for switching and/or adjusting especially a main parameter of the domestic appliance (1) when the domestic appliance is in a switched-on mode, wherein the domestic appliance (2) has a display element (3) by which a value especially of a main parameter of the domestic appliance (1) can be displayed when the domestic appliance (1) is in a switched-on mode and wherein an alarm clock function can be activated in an alarm clock operation mode in which a time or a time interval can be set till triggering an alarm. To facilitate the use of an alarm clock function of the domestic appliance, the invention is characterized in that the alarm clock operation mode is started immediately after pressing and/or activating of the at least one switching and/or adjusting element (2) when the domestic appliance is in a switched-off mode.
