Abstract (en)

The device (10) has a storage device (26) for storing parameter data that are readable by an electrical device. A terminal (12) is provided for a power source and another terminal (14) is provided at the electrical device. The terminals comprise a plug (16) or are formed by the plug. The storage device is positioned and molded at a carrier (24), and comprises a non volatile memory. An interface (34) is attached to the storage device for reading the data and/or writing the data, where the storage device is arranged at the plug. Independent claims are also included for the following: (1) a combination of a power supply connection device and a programming device (2) a combination of a power supply connection device and an electrical device.

Abstract (de)

Stromversorgungs-Anschlussvorrichtung für ein parametrierbares elektrisches Gerät, umfassend einen ersten Anschluss für eine Stromquelle, einen zweiten Anschluss an das elektrische Gerät, und eine Speichereinrichtung für Parameterdaten, welche durch das elektrische Gerät auslesbar sind.
