Abstract (en)

[origin: WO2009105827A1] A game controller for a multiple player terminal game system comprising: a terminal exchange adapted for data communication with a plurality of player terminals whereby players enter game play instructions; a random result generator; a memory module storing two or more sets of game play rules, each for a different game adapted to use the random number generator; and a game rule selector controllable by an operator to select one of the sets of game play rules to apply to game play by all players.
