Abstract (en)
[origin: WO2009106484A1] The invention relates to a spray gun system (10) comprising a spray gun (38) for dispensing spray material and to which a container (50) for the spray material can be fixed, a base device (12) comprising a housing (14) in which a compressed air generation device is accommodated, and a compressed air tube (36) that can be connected to the spray gun (38) and to the base device (12) in order to connect said parts together. The housing (14) of the base device (12) comprises a receiving chamber (22) that can be accessed from the outside by a user and that is designed in such a way that components of the spray gun system (10) can be stored therein.
