Abstract (en)  
[origin: WO2009112016A1] A motor vehicle door, comprising at least one closing/opening device (1, 5), which applies a force that closes or opens the motor vehicle door with respect to the motor vehicle body (7) at least during a closing/opening process, and comprising a sensor (6), which captures a predetermined position of the motor vehicle door with respect to the motor vehicle body (7) and accordingly controls a drive (5) of the closing/opening device (1, 5), wherein the drive (5) applies a force on the closing/opening device (1, 5) regardless of the closing/opening process as a function of defined driving states of the motor vehicle.
