Abstract (en)
[origin: WO2009112755A1] The invention relates to a device (3, 9) for easily opening packaging formed of a synthetic film capable of being torn, comprising at least one tear pellet (4) covering at least one incision (3) formed through at least part of the film, the device being characterized in that it also comprises a label (7) which has a holding portion (9) and, attached to the outer face of the film, an adhesive portion (8) covering at least part of at least one tear pellet (4). Said label (7) is designed so that pulling the holding portion (9) separates the adhesive portion (8) from the outer face of the film, pulls at least part of the tear pellet (4) covered by this adhesive portion (8), and makes a tear in the film.
