Abstract (en)

[origin: WO2009121695A1] A current transformer assembly (10) comprising input connections (3), output connections (1), current transformers (2) placed between the input connections (3) and the output connections (1), with at least one transformer output (4) being electrically connected to said transformers, and comprising an integrated wiring arrangement (5), is being patented, wherein a plurality of input connections (3) is electrically connected to a plurality of output connections (1) by way of the integrated wiring arrangement (5) such that the wiring arrangement (5) functions as an alternating wiring system. An independent patent claim is provided for an electromechanical switching device.
