Abstract (en)

[origin: WO2009121561A1] The invention relates to a fuel cell system (1) comprising at least one fuel cell (2) which has an anode region (4) and a cathode region (3) and is arranged in a housing (6), wherein a rinsing medium for rinsing the housing (6) can be introduced into the housing (6), in a region (7) outside the fuel cell (2). The rinsing medium is an exhaust gas produced in the cathode region (3) during the operation of the fuel cell (2). The invention also relates to a method for operating such a fuel cell system.
