Abstract (en)

[origin: EP2384663A1] The backpack (1) has two carrying straps (4a, 4b) arranged to position and maintain a main rear pocket (2) on shoulders of a wearer (5). The main rear pocket is formed by juncture of a base panel (8) made of a flexible material and in contact with a wearer body and an outer panel made of a flexible material. The base panel is extended to ends (6a, 6b) of the main rear pocket to form two lateral loops, closed for passage of arms of the wearer, forming the straps. The base panel comprises an elastic portion (19) jointed at a lower anchoring region of the straps.
