Abstract (en)
[origin: EP2258518A2] The screw magazine attachment has a base body (21) coupled to the screwing device by a coupling device and has a tool guide (58) for guiding a screw driver tool (56) driven by the screwing device. A conveying clip part (41) is positioned around a catch pivot axis (62) transverse to a slide-displacement axis (47) at a bearing arrangement of a slide. The slide is pivoted between an engaging position (E), in which the conveying clip part engages into the screw magazine (14), and in a released position, in which the conveying clip part is out of engagement with the screw magazine.
