Abstract (en)
[origin: EP2258597A1] The bogie (1) two pairs of wheels (2), in which the wheels of one pair are connected by a shaft to form an axle (4). The axles are connected by a chassis comprising two semi-chassis (8). Each semi-chassis has side members (10) connected by a cross-member (12). Each side member of one semi-chassis is connected to another side member of another semi-chassis by a connector (20). The connector is articulatably mounted on the side members. The connector extends in a horizontal plane offset in terms of height relative to a horizontal plane passing via an articulation device.
