Abstract (en)

[origin: EP2258625A2] The body has a circular surface area, a base, an upper side and a lateral area which forms a structuring. The structuring is aligned parallel to a longitudinal axis of the body. The longitudinal axis is aligned perpendicular to the base of the body. The structuring forms a circumferential connecting element. Independent claims are also included for the following: (1) a bundle consisting of a combination of two bodies with an adhesive joint between the bodies; (2) a device for manufacturing a bundle formed of bodies; and (3) a method for manufacturing a bundle formed of bodies.
