Abstract (en)
[origin: WO2009112200A1] The invention relates to a hair removal device (1) having a hair removal unit (30) and a skin cooling unit (10), wherein the skin cooling unit (10) has a skin contact surface (11), and the skin cooling unit (10) is equipped to apply an application substance (80) onto the skin by way of the skin contact surface (11) during use of the hair removal device. In addition to the cooling of the skin by means of contact cooling, a further cooling effect may also be achieved in such a hair removal device in that an application substance is applied, which contributes to the cooling of the skin, for example, by means of evaporation. The hair removal device may comprise a removable attachment, which also comprises at least the skin contact surface (11).
