Abstract (en)

[origin: WO2009124049A1] A package for dispensing a liquid personal care product, the package comprising: a body for grasping with a user's hand; an applicator comprising an applicator base and a skin-contacting portion extending from the applicator base to a first height; a dispensing conduit through which a liquid personal care product is dispensable from the body, wherein the dispensing conduit comprises a proximal end and a distal end, wherein the proximal end comprises an inlet that is in fluid communication with the body, wherein the distal end extends from the applicator base to a second height that is less than the first height; and a flow-restricting member associated with the dispensing conduit.
