Abstract (en)
[origin: EP2108489A1] The clipper has a cutting mechanism defining a cutting line (6), and a cutting guide comprising a foot with a bent bearing surface. A control unit (17) e.g. cutting length adjusting slide or grip, allows variation in a distance between the cutting line and the bearing surface of the foot along a curved path, when the control unit is in utilization. A bar (13) connects the control unit to the foot, where the foot is removable from the clipper.
