Abstract (en)

[origin: CA2718690A1] The invention relates to a damping device (9) for damping an opening and/or closing motion of a furniture fitting (3), wherein the damping device (9) comprises a restoring mechanism (12), by which an actuating element (7) of the damping device (9) can be moved into a starting position of the subsequent damping stroke after damping has been carried out, wherein the location of the starting position of the actuating element (7) can be set relative to the damping device (9) by an adjusting unit (8). The actuating element (7) of the damping device (9) is rotatably supported, wherein the adjusting unit (8) can be used to adjustably limit the restoring stroke of the actuating element (7) relative to the damping device (9).
