Abstract (en)

[origin: EP2098673A1] The assembly has a rectangular glass roof with a chassis pivotably mounted in a fixed opening frame, where the chassis and the frame are constituted of rectilinear plastic/metallic profile segments (5, 25). A sealing unit is constituted of a tubular elastic sealing joint (29) and a lower strip (14), and a locking unit is constituted of spring blocks (18, 19) and a stop bar, to lock the chassis with respect to the frame. A position of a pivoting axis (13) is fixed and symmetric with respect to the frame. The units permit the pivoting of the roof at an angle of 180 degrees, in unlocked position.
