Abstract (en)

[origin: WO2009109381A2] The invention relates to a light, in particular for obtaining a light that is similar to daylight, comprising a board (12) that houses LED-illuminating means wherein at least white LEDs (26, 27) and coloured LEDs (22, 23, 24) are provided as LED illuminating means. Said board (12) comprises at least one light module (14), comprising at least two stands (21) with LEDs (22, 23, 24, 26, 27) and the at least one light module (14) can be controlled by a current supply (16) and a control device (18). A control valve (36) is provided in the control device (18) for each strand (21).
