Abstract (en)

[origin: WO2009117991A1] The subject matter of the present invention is a component carrier for electrical/electronic components (1, 2, 3; 4), in particular for mounting in a motor vehicle door lock, and an associated manufacturing method. The component carrier is equipped with at least one carrier plate (10) and with a conductor track structure (9) for making contact with the components (1, 2, 3; 4). According to the invention, the electrical components (1, 2, 3) and/or their contacts (11) and the conductor track structure (9) are arranged on two different sides compared to the carrier plate (9) arranged between them.
